

Retail Accounting

Testimonials

What our clients are saying about us

Our dedicated team members are committed to providing our customers with professional and accurate services. The positive feedback we receive from our clients confirms this. We are happy to provide you with references upon request.

"We wouldn't know what we would do without Retail Accounting."

--An Eastern Region client

"[Our] IRS Corporate Tax Audit for 2010 resulted in a "No Change" ruling. We are very pleased with this result and thank you for a job well done. I tell people that your accounting services are very cost efficient, and now it is apparent that your work passes IRS audits with flying colors. If you were ever in need of a positive reference for your accounting services please let me know."

--A Midwest Region client

"I have used the SUPERVALU Retail Accounting Department for over 20 years. This department has handled my bill paying, payroll, P&L statements, sales tax, 401K plan payments, workers comp audits and many other things that I have needed help on. Retail Accounting has never failed to provide anything but quality, efficient and professional services. Using this service has allowed me more time to focus on operating my stores. To me, Retail Accounting is one of the backbones of my company."

--A Southeastern Region client

"After coming to SUPERVALU from another wholesaler, I am very happy with SUPERVALU Retail Accounting's commitment to communication, accuracy and customer service. They have gone above and beyond my expectations. Impressive!!"

--An Eastern Region client

"I could not have asked for better "partners" from Retail Accounting. They have continually answered any and all questions with patience and clarity. I came into this with limited knowledge of the accounting side of a business, but with the help that I have received, I now have a better understanding of how it works. I couldn't have done this without them."

--An Eastern Region client

"I am a 3rd generation grocer that has used Retail Accounting for all my years. They are extremely easy and pleasant to do business with. When it comes to payroll, tax preparation, preparing the financial statements or any other accounting services we use, we hand over the information and know it is going to be taken care of correctly. If there is ever a problem, issue or something is not matching they are right on top of it and take care of it immediately. I would recommend Retail Accounting to any other retailer looking for an accounting firm."

--A Northern Region client
